VOL. 8 NO. 46 Lancaster Farming, Saturday, October 19, 1963 $2 Per Year

TURNING THE FIRST SPADEFUL OF soil at groundbreaking ceremonies for auction facilities at the Lancaster Stockyards is Fred Campbell, stockyards president, far right. Looking on, left to right, are Ike Weidman, the contractor; James Dunlap, Committee chairman; Earl Smith, Stockyards foreman; Robert Heilbron, president of the Lancaster Livestock Exchange, and Walter M. Dunlap, Sr, livestock commission merchant. L. F. Photo.

## Stockyards Breaks Ground For Cattle Auction Pavilion

Plans for a $60,000 auction sale pavilion to be erected in the heart of the Lancaster Union Stockyards were unveiled Wednesday

According to Robert Heilbron, president of the Lancaster Livestock Exchange, the decision to construct auction facilities at the Yards came at the end of 10 months of survey deliberation and planning.

Construction of the two story concrete block structure is scheduled to begin Monday with completion target date of January 15, 1964. The 36 by 63 pavilion will be heated, conditioned and equipped with a 16 by 8 feet scale with a capacity of 20,000 pounds, so that cattle can be sold singly or in load lots Contractor for the project is Rice and Weidman, Inc

At a meeting prior to ground - breaking ceremonies Wednesday, Heilbron said,

"Throughout all the years, business at the Terminal Markets was transacted by private treaty. However, in the past 15 years the auction sale has become an increasingly popular method of selling cattle, both for buyers as well as sellers.

"Thus it is, after a 10 month study by the Union Stock Yard Company and the Lancaster Livestock Exchange, that we proudly announce this new service to the farmer.

"The auction will supplement our private treaty method of business and it will afford those patrons of the Lancaster Stock Yards a choice in the method by which their cattle may be sold. This sale will take place on a Wednesday of each week with other days being confined to the private treaty method. However, if the demand for the use of the auction warrants additional sale days we shall take the appropriate action

"This new pavilion will be built in the center of the Stock Yards. All cattle arriving for sale will be consigned to a member firm of the Lancaster

## Daniel Hershey Wins Third Honey Title

Sixteen year old Daniel Hershey, Lititz R3, won his third consecutive championship in county 4-H beekeeping roundup Thursday night at the business place of Ralph Gamber, 912 State Street, Lancaster.

Daniel, the son of Mr. and Mrs Elwood D Hershey, a junior at Warwick High School, removed 180 pounds of extracted honey and 50 pounds of comb honey from his four colonies this year. He began his bee project three years ago with two purchased colonies and has captured and

## Soil Conservation District Pledged Probe Of School Water Diversion

Directors of the Lancaster County Soil Conservation District Tuesday night pledged to investigate reports of water from a school ground paved area running over farm land.

The decision to approach the school board came at a meeting of directors and associate directors at the Production Credit building, Roseville Road.

Reports from farmers in the area near an eastern Lancaster County high school say that the water which collects on the paved area around the school is not channeled away from farm land is causing an erosion problem on several farms. Directors, and Martin Muth, of the Soil Conservation Service will survey the problem and inform the school board of its responsibility for channeling runoff water properly.

In a discussion of Project 70, the state Department of Forests and Waters' project of acquiring land for recreational purposes, two associate directors voiced objection to the program on the gorunds that they feared the state would condemn and purchase good farm land for state parks They were informed that Forests and Waters Secretary Maurice God-

## Business-Farm Day Invites 600

Lancaster County farmers and their wives, about 600 in all, are being invited to tour and inspect local businesses and industries during the annual Business-Farm Day, November 5.

Sponsored by the Lancaster Chamber of Commerce, the day's activities will include morning plant and store inspections followed by lunch and a talk by E Clinton Stokes.

The guest speaker is from the U S. Chamber of Commerce's Agriculture Committee. His topic will be "the Interdependence of Business, Industry and Agriculture."

M. M Smith chairman of

## Exchange Student Impressed By National Future Farmer Officers

I didn't know the Future Farmers of America was such a big organization, was the way Mario Arroyo, an exchange student from Costa Rico, described the most impressive sight on a recent trip to the national convention of the FFA in Kansas City.

Mario, an exchange student at the Garden Spot High School in New Holland, went to the convention as a guest of the Grassland Chapter of Future Farmers last week.

The 18-year-old student plans to return to Costa Rico next June after a year in New Holland. There he will enter the City University at San Jose where he will study medicine. Mario, the son of a carpenter, will be the first of his family to enter the medical profession. He has four younger brothers and three sisters.

Mario, who comes from the town of Pavas near San Jose,

## FIVE-DAY WEATHER FORECAST

**Temperatures during the next five days are expected to average about 7 or more degrees above the normal range of 67 in the afternoon to 46 at night. The weather will remain on the warm side during the first half of the period and turn to more seasonal levels in the latter half. Precipitation is expected to be less than a half inch, falling as local showers about Monday. No appreciable rainfall is expected in the period.**

Calves: 399. Vealers strong to 2.00 higher.

Choice and Prime grade vealers 33.00-38 00, few to 42. 00, Good 30.00-33.00, Standard 25 00-31.00, Utility 18 00-25.00.

Sheep: 13. Few Utility and Good wooled slaughter ewes 3.50-5 00.

* * * * *

The 143 dairy cows at the October 16 auction met a steady market at New Holland. There were 13 stock heifers on offer.

Fresh Holstein cows brought $275-375; Guernseys $150-225, and other breeds $150-275. Stock heifers brought $70-140.

At the October 14 sale 279 horses sold at steady prices. Riding horses brought $110-150; driving horses made $110-200; pony mares $40-110 and geldings $30-100. Killer horses were 6½ to 7 cents a pound

The October 14 sale saw 333 market hogs sell at steady prices. Retail hogs to local butchers brought 18 25 to 19. Grades 1 to 3 went to packers at 16.85 to 17 35, and heavyweights were 15 60 to 16 75. Sows were 13 to 15.50.
13 to 15.50.

Calves sold steady at the Oct. 14 sale. Receipts included 103 head. Choice and prime vealers brought 33-38, good and low choice 29-33, standard 25-29, and common 15-25.

DO YOU KNOW HOW MUCH MILK YOUR COWS CAN REALLY GIVE?

A cow is a factory. She eats grass, hay, silage, grain and Wayne Feeds. She makes milk. Each cow-factory has a certain bred-in capacity. When Bossy's assembly line isn't running at full capacity, she isn't making as much money for you as she should. ■ The way to find out if she's really running at full capacity is to put more feed in and see if you get more milk out. FEED HER ACCORDING TO WHAT SHE COULD GIVE TOMORROW, instead of what she gave yesterday. ■ Wayne can show you how to balance these larger feed intakes so that your cows can handle them. You feed the rumen bacteria too, so they can work harder and digest more roughage. ■ See us now for the Wayne Program that will work for you... choose from these quality Wayne Feeds... Wayne 32 Dairy Krums... Wayne Sweet Bulky... Wayne 14% Fitting Ration... Wayne Test Cow... Wayne Sucrene 16 Dairy... or other Wayne supplements and complete feeds to meet your needs... do it today!

# Volume Is Up; Price Softens

Live broiler prices dropped back nearly a cent a pound after a two cent jump last week, but volume was considerably higher at the October 17 sale at the Lancaster Poultry Center.

A total of 122,500 broilers in 21 lots were sold at prices ranging from 15.5 to 16.6 for a sale average of 15.87. Six lots including 16,000 head failed to sell at bids of 15.0 to 15.7.

A lot of 600 roasters brought 20 cents; three lots including 9,125 leghorn fowl brought 7.1 to 8.6, and four lots of 7,640 heavy fowl ranged from 15 7 to 16 1.

The complete sale offered 158,170 birds in 40 lots and sold 140,520 birds in 30 lots.

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

CODE: H-F-Heavy Fowl, WV-White Vantress, L-F-Leghorn Fowl, IR-Indian River, WXC-White Cross Cobbs, WVC-White Vantress Cockerels, GWX-Greiders White Cross.

# Price Declines; Demand Is Fair

Delmarva reported live broiler prices declined nearly a quarter cent during the 24 hour period ending 10:30 Friday morning. Demand was fair for the light auction offerings.

Prices and reported purchases in Delmarva ranged 15 3 to 16.0 for 1,031,400 head at farms during the period. Purchases included 455,300 head sold at Thursday's Selbyville, Del. auction where nearly half the sales were at 15.5 to 15.9.

Estimated slaughter for the weekend by Eastern Shore processors was 744,000 head compared to 808,000 head last weekend.

The Delmarva broiler-feed ratio for the week ending October 11 was up two points to 3.0 from the previous week. Broilers during the week averaged 15.02 and mash cost the grower $100.69 per ton. The ratio for the comparable week a year ago was 2.9 when broilers averaged 12.88 and mash cost $88.95 per ton.

# From Where We Stand . . .

## Be Sure You Come Back Upright

Another hunting season is upon the land.

Millions of Americans will take to the woods and fields this fall in quest of every form of game from cottontail rabbits to Canadian moose. **All will go** with high hopes of success and of returning proudly home with filled bags.

But, the American Medical Association tells us that at least 200 of these hunters will not return under their own power. They will be brought back dead — the victims of hunting accidents involving guns.

The rules for gun safety would fill many books, but they are fairly simple, founded on the hard rock of down-to-earth common sense In fact, it is the very simplicity of the rules that encourage some gun handlers to ignore or bypass them.

In the heat of the hunt, many shooters forget that their weapons will shoot just as accurately and as deadly when pointed away from the line of sight as they will when aimed at game.

Before you go into the fields this year, think over these simple rules; see how common-sense they are, and see how very little time and effort is involved in observing them.

Know what you are firing at before you pull the trigger Everyone knows this rule, yet every year several hunters are killed by companions who thought the rustle in the bushes was made by a deer.

Never climb over or through a fence without first unloading the gun We know you might miss a shot at a rabbit, but that is better than shooting yourself or a companion.

Never shoot at hard flat surfaces; ricochets can wound and kill. This rule includes being sure of your background as well as your target. Shooting towards buildings or highways can be as dangerous as taking direct aim at people or property.

Keep guns and ammunition away from children This does not mean just babies. The pre-teen youngster who has seen his father handling the gun in the house but never in the field has no way of knowing the terrible force enclosed in those shiny shells. Teenagers often handle guns safely, but they should never be trusted to handle a gun alone unless they have demonstrated that they know and use safe practices.

Be absolutely sure guns carried into camp or home are unloaded. Keep them cased until your hunting area is reached.

Never look down a gun barrel to see if its's loaded This rule sounds ridiculous, but breaking it is the cause of deaths every year Treat every gun as if it were loaded.

Never point the gun at anything you don't want to shoot, and always keep the safety on until you are ready to shoot.

Remember that alcohol and ammunition can make a deadly mixture.

In sum, treat a gun with the respect it deserves Work on the principle that it is always loaded and ready to fire, even though you know it isn't.

We know it is too much to expect — or to even hope for — but if everyone followed these rules, all the armies of hunters — yourself included — will come home under their own power.

At least that's how it looks from where we stand.

## It's Still Dry

Most of Pennsylvania is still suffering through the second season of severe drought.

Many areas of the state and most of Lancaster County will be short of forage for cattle this winter.

In addition to the dry weather, late frosts last spring and early frosts this fall made 1963 one of the shortest growing seasons on record.

But not all the farm picture is totally bleak. Several farmers this week have reported corn yields in excess of 100 bushels. The local wheat crop was above average in yield and much of it excellent in quality. The barley harvest was near average, and the crop reporting service of the state Department of Agriculture said the oat crop was one of the best on record.

Many Lancaster County farmers reported near record tomato yields with higher prices than have been seen in several years. Some tobacco farmers were caught with part of their crop in the field when frost came, but several have told us they disced down the frozen leaf, hoping the sound tobacco might be a little higher in price this winter.

We do not mean to belittle the seriousness of the drought, but we believe one county farmer summed it up pretty well this week when he said, "We sure could use some rain, but we ought not complain — we have so many other things to be thankful for."

And we are thankful there are still farmers with this attitude.

At least that's how it looks from where we stand.

**Fallout Overplayed**—"There is no reason whatsoever for the public to reduce consumption of milk or other dairy products due to fear of radioactive contamination," says the assistant surgeon general. He says the public has shown greater concern over fallout in milk than the facts warrant. Fallout levels in foods including milk are now and never have been at a dangerous level.

**Countryside Brighteners** — The countryside is scheduled for an innundation of bright, eye-catching posters. Joint Agriculture and Interior Department plans are to plaster them over camp and picnic grounds. The poster — yellow and black on white, showing a "despicable little creature throwing trash in all directions" — will assure instant attention and readability. Purpose: to discourage litterbugs.

# THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

## For My Neighbor

**Lesson for October 20, 1963**

Bible Material: Matthew 4:1-11; I Corinthians 8 through 11:1.
Devotional Reading: I Corinthians 8:7-13.

AS A Christian, I have acknowledged my responsibility in two directions. I am responsible TO God and FOR my neighbor. No matter how high in the scale of human society a man may live, he never can climb so high that he is no longer answerable to God. No matter how high a wall a man builds around himself, though he may shut himself away from mankind, or from the needy part of mankind, every man is still responsible to God for his neighbor. This is true of all men whether they know it and believe it and live by it, or not. The Christian is not the only man who has this double responsibility, but he is the only man who is clearly aware of this. If he is not aware of it, or denies it, we have a right to ask, Is he actually Christian?

Dr. Foreman

**Three illustrations**

Three illustrations will show how this works out in practice. Take first the problem of liquor. Many a man is able to drink in moderation all his life Such a man may say to himself: "Drinking or not-drinking is a personal problem. Every man must solve it or answer it in his own way according to his own best judgment. Other people have no business caring whether I drink or not, and it's not my business to inquire whether other people can drink and hold their liquor like gentlemen. Every tub must stand on its own bottom."

But this man, just because he himself can "hold his liquor like a gentleman," can be one of the worst influences in his community. You will hear such a man denouncing juvenile delinquency, unaware that he is contributing to the very delinquency of which he complains. For others, seeing how little he is hurt by his temperate drinking, will be encouraged to drink also, only to find, when it is too late, that they haven't the same powers of restraint.

**Attitudes**

Another illustration: Some people are so constructed mentally that they can take, or seem to take, some wrong attitude more or less in fun, without really meaning it. They speak of sacred things in a tone of light mockery, or they make all sorts of jokes, some pretty sorry ones, about marriage, or women, or the church. They will say with a laugh, "I'd like to wring his neck" or refer to some absent person as "that dirty buzzard." Now such a person may be one who really doesn't mean any harm by this, and takes no harm himself. It's just a "manner of speaking." He doesn't seem to be affected by the silly or vulgar words that pass his lips. Essentially he remains an honest and honorable man. (This doesn't happen often, but it does happen.) Now here is a parallel to your moderate drinker. This careless talker spreads the dirt or the froth in moderation. He's really sober for all his careless speech. But perhaps just because he is an attractive personality, he (maybe without intending it) induces others to imitate him. And most of these imitators find out, too late, that "he that toucheth pitch shall be defiled." Using vulgar language leaves the user vulgar; use of the language of hate and contempt helps to shape the soul of the man who even plays at hatred and contempt. "It doesn't hurt me," the first man says. But it hurts others who try it, just to be smart. The first man does harm to others, just because he doesn't think about others. He feels responsible for himself alone, whereas he is actually responsible for all whom he influences.

**Justice**

Take a third example. Some condition of injustice may be pressing hard on some of your neighbors. Not neighbors you see, perhaps, but the "invisible poor," for example. It may be a bad condition in the public schools; or it may be the denial of an education to those who are eager for it; it may be lack of recreation facilities for young people; it may be an unfair differential in wages because of sex or race. Whatever the injustice may be, if it doesn't hurt me I'm not likely to worry much about it. But this carelessness about injustice from which we benefit is exactly the opposite of the Christian position. The Christian question always should be: "What is this doing to my brother, my neighbor?"

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press

# Now Is The Time . . .

BY MAX SMITH

MAX SMITH

**To Control Internal Parasites In Cattle**

With the increase in cattle population on many farms in the east and the south, a build-up of stomach worms is occuring Local dairymen are urged to prevent young stock from eating hay or silage from the floor where worm eggs could be, hay racks should be constructed to reduce the fall of leaves and hay to the floor as the animals eat it. Plans are available for these pieces of equipment Cattle feeders that import feeder cattle should have the animals checked by their veterinarian and treated for stomach worms These practices will reduce feed costs and increase profits.

**To Be Alert For Wild Cherry Trees**

When wild cherry leaves are damaged by frost, or in a wilting stage, or entirely wilted, they are poisonous and may kill nearly all types of livestock After severe storms, broken limbs or fallen trees are very dangerous Producers are urged to cut down all wild cherry trees this fall in their pastures and thus eliminate this problem.

**To Harvest Blue Gill Fish**

The fall of the year is a good time to fish the farm ponds and reap the meat harvest from this part of the farm. Many farm ponds are over-stocked with blue gills which may interfere with normal bass re-production; also; too many fish in the pond actually means there is not enough food to make them grow normally Pond owners are urged to permit the heavy fishing of the blue gills in order to maintain the proper fish balance.

**To Topdress Pastures And Hay Fields**

The fall of the year is a good time to apply phosphorus and potash fertilizer to grass-legume forage mixtures. After the last cutting of alfalfa or clover, and after the livestock have been taken from the pasture to their winter quarters, the application of 300 to 400 pounds of an 0-20-20 or 0-15-30 will fur-

### ● Now Is The Time

(Continued from Page 4)

nish needed soil elements for a better crop next summer. This should be done several weeks before the ground freezes solid.

### Use Corn Picker Carefully

For safe and efficient operation, The Pennsylvania Farm & Home Safety Committee urges keeping the corn picker in good working condition. Otherwise, accidents are more likely. A corn picker can snap an arm or hand as easily as a tough ear of corn. Carelessness around a corn picker and other heavy farm equipment pays off in painful accidents.

### Apply Wax in Thin Coats

One common mistake in waxing smooth surface floor coverings is to apply too much wax, points out Helen Bell, Penn State extension home management specialist A thin film hardens more quickly and gives better protection This is because the moisture in the wax can evaporate Thick coatings leave sub-surface wax soft and this makes the floor more susceptible to denting and surface scratches

### Use a Shopping List

You invest a sizable amount of your family's income in the food you buy. That's why it pays to plan menus ahead and make a shopping list, believes Louise Hamilton, Penn State extension nutrition specialist A shopping list can be flexible enough to permit taking advantage of unadvertised specials or weekly sales. Yet a shooping list, even a rough one, helps to check impulse buying Unrestrained impulse buying can skyrocket the food bill.

## ● Soil Conservation

(Continued from Page 1)

dard, recently said at an open meeting in Lancaster, no state parks would be built in any area without local cooperation.

In other business, directors approved applications for 11 conservation plans. Agreements have been signed by the following landholders.

Willis H. Martin, Ephrata R2, 63 acres; Paul Burkholder, Lititz R4, 70 acres, Levi Huyard, New Holland R1, 70 acres; Earl Horst, Denver R1, 100 acres, Leon Burkholder, New Holland R1, 63 acres, Eli M. Huber, Narvon R1, 90 acres, Noah M. Shirk, Narvon R1, 92 acres; Isaac N. Hoover, East Earl R1, 66 acres; Alvin Sauder, East Earl R1, 59 acres; Leroy W. Martin, East Earl R1, 65 acres, and Elizabethtown Chapter Future Farmers of America, 15 to 20 acres.

## ● Business-Farm

(Continued from Page 1)

the day's events, said invitations will go out to about 250 more farm families this year than in the past. The program's expansion came at the request of the farmers.

**Dual Purpose**

The Chamber of Commerce listed a two-fold purpose for the program:

1. To offer factual information about business operations to provide the farmers with a better understanding of the American Free Enterprise System. The C of C said, evidence indicates there are many misconceptions about the capital structure of business, the motives and procedures of management, the rates and character of profit and loss, the conceptions about the capital and similar phases of the successful conduct of business.

2. To promote a better understanding by farmers of how manufacturing, retail and wholesale distribution, service trades, banking and finance all have a place in our economic pattern and how all of these, in turn, serve and are served by agriculture.

On alternating years, county businessmen visit Lancaster farms and farmers tour local industry Last year over 200 representatives of Lancaster's industry spent a day on the farm.

## ● Exchange Student

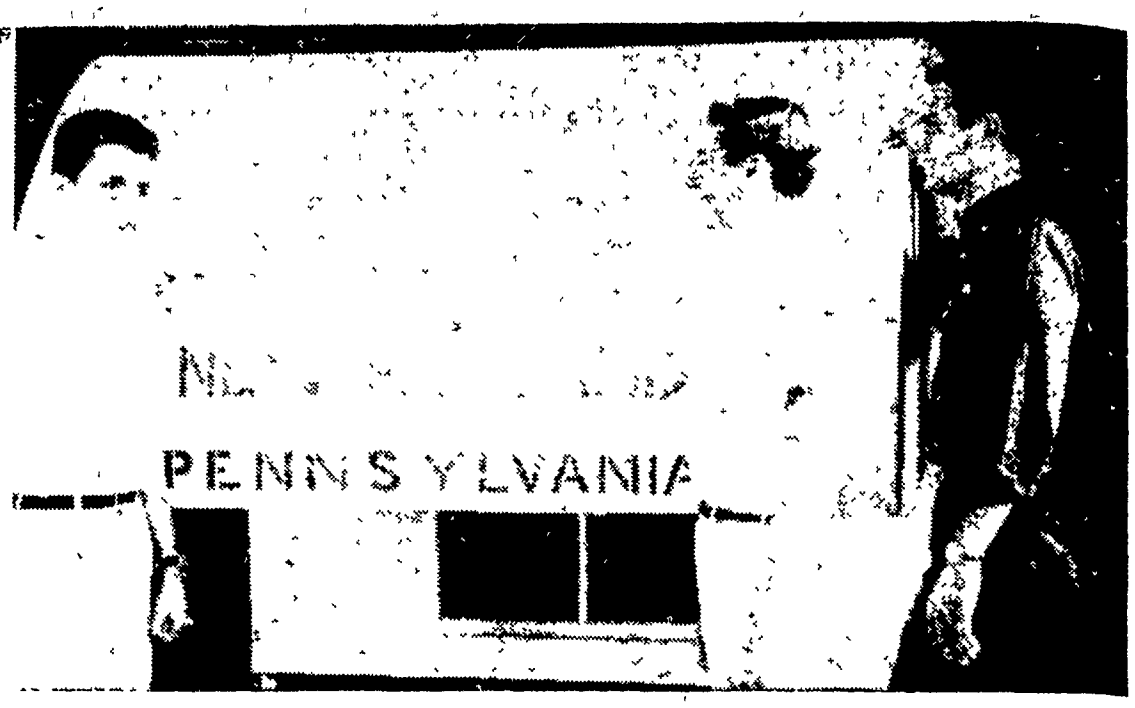
(Continued from Page 1)

says he was most surprised by the friendliness of American people He said he expected the people of the United States to be friendly, but they are much warmer than he had expected.

He also finds the changing seasons a new experience He told of driving through wooded areas on Sunday and seeing red, yellow and brown leaves for the first time in his life. The temperature in Costa Rico sometimes hits a low of 45 degrees in the highest mountains and reaches a high of about 80 on the warmest days.

Sponsored by the Garden Spot Chapter American Field Service, a non profit, educational organization whose purpose is furthering understanding and good will among the peoples of the world, Mario is living with Mr. and Mrs. H. Clair Musselman, 138 W. Main Street, New Holland.

He said one of his greatest thrills since coming here in July was watching the student officers conduct the national FFA meetings of nearly 10,000 blue jacketed farm boys.



LOOKING OVER THE CAMPER that took them to Kansas City last week are three students from Garden Spot High School, New Holland. At left is Mario Arroyo, an exchange student from Costa Rico, who was a guest of the Grasslands Chapter Future Farmers of America on the trip to the national FFA convention. With him are co-chairmen of the trip committee, Clyde Wissler and Kenneth Martin. L. F. Photo.

## ● Honey Producers

(Continued from Page 1)

hived the other two. He scored 91 6 out of a possible 100 points on his project record

In second place was Annette Long, Lititz R3, the daughter of Mr and Mrs Melvin Long

Other exhibit placings were as follows, 3. Clyde Hahn, Columbia R1, 4 William Houser, Lampeter, 5 Lloyd Hahn, Columbia R1, and 6 Albert Henry, New Providence R1.

Members of the Lancaster County Honey Producers Association voted to contact the county Fruit Growers to arrange for a combined banquet. A committee will be appointed by president, Robert Landis

William Clarke, extension Apiary specialist from the Pennsylvania State University, said he had inspected county bees during the afternoon and found that the honey flow this year was only fair. He said the drought had cut the honey flow somewhat, but not too severely Good managers will still average 60 to 80 pounds per colony, he estimated.

Clarke told the beekeepers that some feeding will have to be done, but that supers should be removed now so that the bees will store aster honey, now being collected, will be stored in the brood chamber.

## 4-H Wildlife Club Sees Slides

Members of the county 4-H wildlife club saw slides taken on their recent trip to the mountains at the Thursday night meeting in the home of Marlene Gentzler, New Holland Pike, Lancaster

Roll call was answered by members reporting on the wildlife they had seen during the last month. Harold DeLong, Peach Bottom R1, gave a demonstration on the proper method of trapping foxes.

The next meeting will be on November 20 at the home of Robert Ulrich, Penryn.

Armed with newest weapons and new detection methods, the "new" Navy can move faster, stay at sea longer, hit harder, and reach out farther than ever before.

RATS! RATS!

RATS!

"They fought the dogs, and killed the cats,
and bit the babies in the cradles,
and ate the cheeses out of the vats,
and licked the soup from the cook's own ladles."

## Corn And Hay Yields Are Low

HARRISBURG — Drought and an early freeze seriously reduced 1963 yields of the commonwealth's two most important field crops, hay and corn, according to the Pennsylvania Crop Reporting Service.

The hay crop, suffering from lack of rain, is the third smallest since 1941, the PCRS said. Production is forecast at 3,105,000 tons, 677,000 tons below the 1957-61 average. In 1962 and 1957, both drought years, production was 2,518,000 and 3,059,000 tons, respectively.

Hard freezes in September dimmed corn prospects, and production is now forecast at 47,400,000 bushels. It is a little better than last year's poor crop of 44,100,000 bushels, but well below the 1957-61 average of 54,900,000 bushels.

Some late corn harvested for grain is low in quality, the PCRS added.

## Stock Yards

(Continued from Page 1)

Livestock Exchange which will perform the usual service of identification, sorting, and placing in the ring for sale. Cattle may be sold individually or in lots depending on the judgement of the owner and his commission man. The pavilion will seat approximately 250 people and the target date for completion and operation is January 15, 1964.

"With the addition of this new service the management of the Union Stock Yard Company and the members of the Lancaster Livestock Exchange confidently look to the future that the Lancaster Terminal Market will continue as the center of livestock marketing industry in the East."

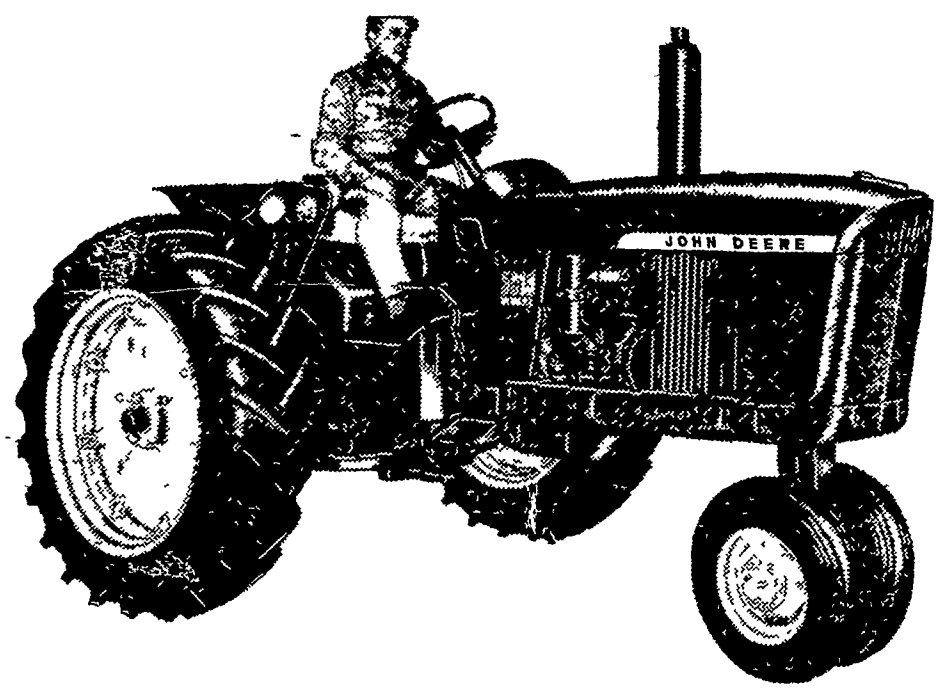
Plans were formulated by the Exchange Auction Committee, James Dunlap, Chm., Robert Johnson, Robert Heilbron and John Hoober, Jr., The Board of Directors of the Stock Yard Company, builders of the Auction Pavilion are: Frederic Campbell, President, Hensel Brown, Walter Dunlap, Sr., and Robert Stauffer. Frederic Campbell also heads the Union Stock Yard Co.

The number of cows on Pennsylvania dairy farms in September was estimated at 848,000, down 2,000 since August and 20,000 less than September a year ago. It was the lowest September total since 1938 when there were 847,000 cows on dairy farms in the state.

### Apply Lime

For land to be seeded to legumes in 1964, now is the best time to correct soil acidity, according to James Hakin, Penn State extension agronomist.

# PRE - INVENTORY
# REDUCTION SALE
## NEW FARM MACHINERY
## AT SPECIAL LOW PRICES



**ANNOUNCEMENT**

Our employees and myself are preparing to file papers with the Commonwealth of Pennsylvania for articles of incorporation for our farm equipment business under the name of A. B. C. Groff, Inc., to be effective November 1, 1963, or as soon thereafter as possible, at which time the new corporation will take charge of sales and service and operation of our farm equipment business.

In order to operate a more efficient business we feel that our present inventory is entirely too high. Therefore, we are listing herewith farm machinery which we are putting on a **Pre-Inventory Reduction Sale** at special prices.

Most of this machinery can be bought on next spring terms with a small down payment, and without interest.

In the past three-fourth century our business has been operating at New Holland under the following titles:

**A. B. Groff, Established - 1890**
**A. B. Groff & Sons, Incorporated - 1920**
**A. B. C. Groff, Individual - 1934**
**A. B. C. Groff, Inc., Incorporated - 1963**

Thank you for your patronage during the past three-fourth century, and trust that it may continue.

**A. B. C. Groff**

Our large stock of new farm machinery will be offered at special low prices until November 2, 1963, as listed as following:

**J.D. No. 630 (steel wheel), Nos. 1010, 2010, 3010 Tractors, and also No. 1010 Crawler Tractor; J.D. Nos. 14T, 24T Balers; N.H. Nos. 65, 270, 271 Balers; J.D. No. 18 Corn Picker; N.I. No. 10 (one row), No. 307 (two row) Corn Pickers; N.I. Nos. 49, 400, 402 Side Rakes, also No. 44 Horse-drawn Side Rake; N.H. No. 56 Side Rakes; N.H. Hay Crusher; N.I. No. 750, 751 Hay Crushers; J.D. No. 1 Hay Crimper; J.D. Nos. 8W, 9W, 10 Mowers; J.D. No. 45 Hi-Lo Combine (self-propelled); Messinger 4-row Crop Duster for tobacco, corn or potatoes; N.H. Manure Loader, $100, as is; J.D. Nos. 35, 45 Manure Loaders; Papec No. 10 Hammer Mill with PTO and trailer attachment; N.I. No. 30H Mower; J.D. No. 6 Hammer Mill; N.I. Horn No. 61 Stalk Shredder; J.D. No. 177B Grain Drill; J.D. # New Records Set By Dairy Herds

HARRISBURG — Two records were set on Pennsylvania dairy farms in September.

Milk production per cow was at an all-time September high, 660 pounds, while cow numbers were the lowest in 25 years, according to the Pennsylvania Crop Reporting Service.

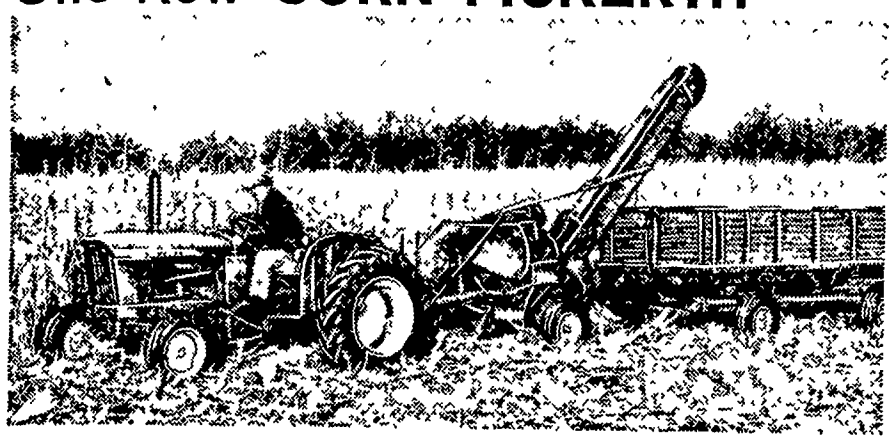
Production per cow, following an almost constant trend during the last quarter of a century, was 18 pounds higher than last September, 74 pounds above the 1957-61 average, and 224 pounds higher than September, 1938.

In the nation, September milk production per cow averaged 581 pounds, up 2 per cent from a year earlier.

Total milk production in September of 560,000,000 pounds was up 3,000,000 pounds over last September.

JOHN DEERE 18

One-Row CORN PICKER...



*NEW spiral-fluted snapping rolls cut shelled corn loss IN HALF*

You save more corn with minimum damage to ears, yet "stay alive" in heavy going with the John Deere 18 One-Row Picker. Its new spiral snapping rolls reduce shelling loss as much as 50 percent compared with lug-type rolls—with no loss of capacity. This modern, compact pull-type hitches easily . . . gives you a fast, economical harvest. Stop in *today*. Ask about the convenient John Deere Credit Plan.

# National Meat Board Official To Demonstrate At Stockyards

Livestock growers and feeders and other people engaged in the various phases of livestock and meat industry in this area will get first-hand reports on October 25 regarding activities being conducted for them to expand and strengthen the market for livestock and meat products.

"An in-person demonstration and presentation has been scheduled by the Lancaster Livestock Market in cooperation with the National Live Stock and Meat Board during Farmer's Field Day at the Lancaster Stock Yards, next Friday morning.

Meat Board participants are Monte Flett, director, Department of Merchandising; and R. B. Elling, director of Industry Relations both of Chicago.

Robert Heilbron, president of the Lancaster Live Stock Exchange, said the purpose of the meeting is to acquaint key people in the livestock and meat industry and related fields with the extensive nationwide activities being carried on through the Board's program of meat research, education, information and promotion.

Mr. Elling will discuss the methods and techniques utilized by the Board in building a favorable image for meat through radio and television,

R. B. ELLING

newspapers and magazines, educational exhibits, personalized educational programs and other activities.

Mr. Flett will actually conduct one of hte Board's famous meat cutting demonstrations by deftly converting a side of beef into wholesale and retail cuts. In the process he will discuss the Board's cooperative efforts with meat retailers and restaurant groups in developing effective meat merchandising techniques. He will show how modern meat cutting and merchandising methods result in greater utilization of the various meat cuts.

# Apple Crop Is 10% Smaller

HARRISBURG — The Keystone State's 1963 apple crop, estimated at 8,500,000 bushels, is 10 per cent smaller than last year, and 2 per cent below the 1957-61 average according to the Pennsylvania Crop Reporting Service.

A late spring frost and dry weather during the growing season was responsible for the reduced crop, the PCRS said. Growers report apples have excellent color.

The peach crop of 2,000,000 bushels was the smallest since 1947, according to the PCRS. Fruit generally has good flavor.

Prospects for the 1963 grape crop have improved, and production of 28,000 tons is forecast. It would be 19 per cent less than last year and 7 per cent below the 1957-61 average.

**New, Low Cost Artificial Dryer Can Solve Your Wet Corn Problem**

Has a slow growing season, plus an early frost left you with wet corn? If this is your problem, now is the time to do something about it *Your County Agent is recommending artificial drying*

A Circle Steel drying and storage bin from Grove Manufacturing Company is not only one of the best, but lowest cost solution to this problem Considerably less than other installations, a Circle Steel bin will give you the advantages of on the farm artificial drying at an initial cost of only $3,000 to $5,000, and can easily be financed over a long term.

They go up in just a couple of days; they're permanent, durable buildings. Circle Steel bins are bottled-gas fired, so simple, they're almost foolproof They have been proved in the midwest grain belt for wheat, soybeans, and shelled corn.

**THIS IS THE YEAR TO DO IT**
A Circle Steel dryer can pay off fast with this year's wet corn

**OTHER ADVANTAGES TOO**
- drying and storing permits you to sell when the market price is at its highest
- allows harvesting at 26% to 28% moisture content, reducing ear drop and snap and roll shelling losses
- prevents molding, rodent and other insect damage.

**LAST MINUTE DEAL**
As Grove Dealers for Circle Steel bins, we have a special wet corn program that will have you drying and storing your corn in as little as a week's time—with little effort on your part—at a cost that will surprise you.

# Eastern States Buys Apple Plant

West Springfield, Mass., October 16, — The Eastern States Farmers' Exchange, Incorporated, today purchased the outstanding stock of Adams County Fruit Packing and Distributing Company, Inc., of Biglerville, Pennsylvania, and will continue the operations of the company as a unit of the cooperative's area services.

Jonathan Davis of Sterling Junction, Massachusetts, president of Eastern States and a well known apple grower, said that the decision of the regional cooperative to buy the Adams County company's fruit storage and service business strengthens the prospects for developing a regional grower-controlled fruit processing and marketing service

"Our Adams County facilities will continue to function as in the past," stated M. E. Knouse who has served the fruit growers' company as president since 1924.

W. D. Milsop, general manager of Eastern States, said that the operating personnel of the Adams County facilities would continue unchanged with the exception that Charles Raffensperger has asked to be retired from active duty as chief executive of the enterprise. He is to be succeeded by Rowe Martin who has been his assistant in the Adams County operations since 1924.

---

Pennsylvania has more licensed bow hunters than any other two states in the nation. Last year 66,045 archers took out licenses for the 1962 bow hunting season, reported a harvest of 1,310 deer.

# Future Farmers Win Placings At Nat'l FFA

Two Future Farmers from Penn Manor High School were on the Pennsylvania Poultry Judging team that won a silver medal in national competition last week at Kansas City.

Daniel Erb won a gold medal in individual competition and Carson Kauffman won a silver medal to lead the state team to the silver emblem. A total of 108 youths were in poultry judging competition at the 35th annual convention of the national Future Farmers of America.

A third member of the state team, William Hock, Mahanoy Joint High School, won a bronze medal.

A silver team medal designated fourth through sixth place; individual gold medals one through ten, and individual silver 11 through 20.

William Shirk, Garden Spot High School won a Bronze medal in the meats judging contest. The state team also won a bronze medal in competition with 36 other FFA teams.

**Life Expectancy of Rug**

Quality and performance from a rug or carpet depend on grade and amount of materials used in it, closeness and compactness of weave, and a firmly woven backing, says Penn State extension home management specialists

**Winter Oats**

Because they are not too winter-hardy, the sowing of winter oats is limited to southeastern Pennsylvania, warns Elmer Pifer, Penn State extension agronomist. The sowing dates are September 10 to 25.

## Calves 17 lbs. heavier on Purina Calf Startena Checkers

**Recent Purina Farm test on 21 calves gives Calf Startena in pellet form edge over Calf Startena Meal.**

New Purina Calf Startena Checkers was developed over four years of research at the Purina Farm Dairy Unit, Gray Summit, Mo. This new product has several big advantages:

1. It's easy to handle and feed . . . makes feeding a calf ration easier than ever before.
2. Each calf gets exactly the right amount of essential ingredients . . . can't select some ingredients and leave others.
3. There's less waste in pails or trough, no fines . . . so it's economical to feed.
4. Test calves fed new Startena Checkers were 17 lbs. heavier at four months than calves grown on Calf Startena Meal . . . and Calf Startena Meal calves are far heavier than average!

Come see us. We want to tell you more about Purina Calf Startena Checkers.

**Prove to yourself . . . Purina feeding can cost you less.**

# Lieutenant Governor To Address Farmers

Lieutenant Governor Raymond Philip Shafer will be the speaker at the annual banquet of the Lancaster County Farmers' association on October 22 at 7 p.m. in the Blue Ball fire hall.

The Commonwealth's "number-two" man in the executive branch of the government is Lieutenant Governor Shafer of Meadville in Crawford County, who also is a close associate of Governor William Scranton. The two men first became friends when they studied together at the Yale Law School prior to World War II. As a pre-law student, he graduated cum laude from Allegheny College. After graduating from Yale, he joined the law office of Secretary of War Henry L. Stimson, but then volunteered for duty in the U. S. Navy where he served over 42 months. During this time he was a PT boat Commander with over 80 combat missions in the South Pacific. His decorations include the Purple Heart, Bronze Star, and the Philippine Liberation Medal.

He was elected District Attorney in 1947, and in 1958 he was elected State Senator of the 50th. District. In 1962 he was elected Lieutenant Governor of Pennsylvania.

SHAFER

At this meeting the Association will elect new directors. Also there will be an opportunity for members to present and approve policies which in turn will be presented at the State Convention. Reservations should be made immediately.

---

When sudan grass or sorghum is frosted deadly acids are formed. Dr. Samuel B. Guss, Penn State extension veterinarian, warns livestock producers to keep livestock away from fields of frosted forage, because a few mouthfuls of it can kill a cow. If poisoning occurs, early treatment is necessary.

# Dairy Expert Will Speak At Hay Show

Dr. C H Gordon, U. S. Department of Agriculture dairyman, will discuss the farm potential of low moisture hay crop silage at the Southeastern Pennsylvania Quality Forage Conference and Hay Show, Oct. 29, at the Guernsey sales pavilion, Lincoln Highway East.

He has conducted outstanding studies on ensiling low moisture hay crop silage in conventional silos.

Other speakers will be T A. Herman, assistant farm manager of M S Hershey School Farms, who will describe experiences with low moisture silage this year, and John E. Baylor, Pennsylvania State University Extension Service agronomist, who will outline a forage program for area farmers.

In addition to the conference and hay show, Penn State agricultural engineers will demonstrate various moisture in silage.

Entries in the hay show may be made any time before 10 a m Tuesday, October 29 at the office of the county agent, or at the Guernsey Pavilion on the day of the show.

Hay for entries must have been grown by the exhibitor in 1963 Exhibitors may enter as many classes as they wish, but no exhibitor may enter more than one sample in any one class Entry blanks for any of the 12 classes of long hay are available at the office of the County Agent.

---

Archery is one of the fastest growing participant sports in the United States. In 1946 there were 1,700,000 archers. This year the figure is estimated at 7,500,000.

## *Make A Packed Lunch Interesting*

**By Mrs. Richard C. Spence**

A packed lunch for the school child or employed adult can be a good, nutritious meal instead of just a "sack of snacks". In addition to foods with needed nutrients, a good packed lunch might include a "surprise" of some kind, as well as variety in the kinds of foods packed in the lunch box.

Everyone gets tired of eating the same kind of food every day and there isn't any reason why a packed lunch can't be just as interesting as a meal served at home.

Any meal — including a packed lunch — should contain foods with the essential nutrients. Daily requirements for everyone include four or more servings of fruit and vegetables and of breads and cereals and two or more servings of meat poultry or eggs and of milk or cheese.

Sandwiches are not the only fare suitable for the lunch box. Vacuum bottles, especially the wide-mouthed type, make all kinds of main dishes adaptable to the packed lunch, even including salads and desserts

A vacuum bottle might carry such main dishes as chili, all kinds of soup, spaghetti, frankfurters stew, barbecued meat or other hot sandwich fillings Cold chicken or seafood salad, shrimp cocktail, potato salad and other perishable foods can be kept cold in a vacuum bottle.

For hot dishes, pre-heat the vacuum bottle by filling it with boiling water To pre-cool the bottle for cold dishes, place the open vacuum bottle in the refrigerator over night and then place the cold food in it in the morning

Sandwiches are a traditional lunch box item but they should be varied from day to day, using different kinds of breads and rolls as well as a variety of fillings. A main dish might be served in the vacuum bottle along with a hard roll, biscuits or muffins for variety. Bread for sandwiches might include enriched white bread, cheese, pumpernickel, rye, whole wheat or cracked wheat bread, poppy seed rolls, frankfurter or hamburger buns, banana, date or nut bread and many other kinds.

Unusual sandwich fillings and filling combinations add variety to the packed lunch too. You might try some of these — cheese and egg slices with chili sauce or mayonnaise, hard-cooked eggs and sliced frankfurters, roast pork and apple butter, sliced ham with jelly, meat loaf with pickle relish, peanut butter with bacon, raisins or sliced cucumbers, egg or tuna salad with chopped olives or nuts. Thin slices of meat make a better sandwich than one thick slice To accompany meat sandwiches, place lettuce, slices of onion and tomato in a small plastic bag to be added to the sandwich at lunch time. This will prevent a soggy sandwich.

Perishable foods such as egg, potato, fish, meat or chicken salad and custards or custard fillings should not be kept longer than four hours if the temperature is above 50 degrees. These foods should be very cold when put into the lunch box, and it's preferable to carry them in a pre-chilled vacuum bottle. Another way to keep them cold is to freeze portion-size cans of fruit juice for the lunch. It will keep cold and serve as the beverage — but don't forget the can opener. Be sure to include spoons or other utensils necessary for the meal, along with sufficient napkins.

* * *

A lunch that might rate top score with the teen-age crowd might contain a hearty meat loaf sandwich, olives and pickle sticks, a fresh pear or apple and a frosted cupcake. Include a tomato slice and some lettuce to add to the sandwich. You might make this meatloaf for dinner some evening and then slice it down cold for lunches.

**MEAT LOAF**

- 1½ pound ground beef
- ¾ cup rolled oats, quick or old fashioned, uncooked
- ½ teaspoon salt
- ¼ teaspoon pepper
- ¼ cup chopped onion
- 1 can (1⅝ ounces) cream of mushroom dry soup mix
- 1 egg, beaten
- ¾ cup milk

Combine all ingredients thoroughly. Pack firmly into an 8½ x 4½ x 2½ inch loaf pan. Bake in preheated moderate oven (350 degrees) about one hour and 15 minutes. Let stand 5 minutes before slicing. Makes 8 servings.

* * *

Other sandwich filling suggestions:

**ORANGE BEAN-WICH SPREAD**

- 1 8-ounce can pork and beans or kidney beans, drained (1 cup)

(Continued from Page 14)

2 oranges, peeled, diced, drained (1 cup)
½ cup diced celery
1 teaspoon prepared mustard
2 tablespoons mayonnaise
Salt to taste

Combine all ingredients, blending lightly. Makes 1⅔ cups.

* * *

**BACON 'N EGG SANDWICH SPREAD**

4 hard-cooked eggs, peeled, chopped
2 oranges, peeled, diced, drained (1 cup)
4 to 5 slices bacon, fried crisp, crumbled
3 tablespoons mayonnaise

Combine all ingredients, blending lightly. Makes 1⅔ cups.

* * *

**WESTERN CHICKEN SANDWICH SPREAD**

2 cups chopped, cooked, chicken
3 tablespoons sweet pickle relish
1 tablespoon grated orange peel
2 oranges, peeled, diced, drained (1 cup)
¼ teaspoon salt
3 to 4 tablespoons mayonnaise

Combine chopped chicken, pickle relish, grated peel, drained orange pieces and salt; blend lightly with enough mayonnaise to moisten. Makes 3 cups.

* * *

**TUNA PINEAPPLE FILLING**

1 can (7-ounces) tuna, drained and flaked
½ cup drained, crushed pineapple
1 cup chopped celery
1 8-ounce package cream cheese

Blend ingredients together and store in refrigerator until ready to use. Filling is especially good on rye bread, makes enough for 4 to 6 sandwiches.

* * *

**LUNCH BOX SOUP**

1 10¾ ounce can cream of vegetable soup
1 10½ ounce can cream of mushroom soup
2 soup cans milk

Mix above ingredients; heat and pour into vacuum bottle.

* * *

**CORN CHOWDER**

¼ cup butter or margarine, melted
1 large onion, chopped
2 teaspoons salt
¾ teaspoon pepper
4 large potatoes, peeled and diced
1½ cup water
1 16-ounce can cream-style corn
1 quart milk

Saute onion in butter or mar-

# For the Farm Wife and Family

## Ladies, Have You Heard? . . .

**By: Jane Thurston, Extension Home Economist**

**Guides To Better Service From Your Iron**

THURSTON

Use your iron properly and keep it in good repair and it will give you good service. If the thermostat isn't operating, the iron won't heat or it may overheat. If this is why your iron isn't heating properly, take it back to the dealer, to a serviceman or the manufacturer.

A burned out heating element leaves you with a cold iron. When this happens, follow the same suggestions as for a faulty thermostat.

But, before you hurry to the serviceman, check some common causes, such as the wall outlet . . . is it tight? Have you blown a fuse without being aware of it? Does the cord or plug need repairing? Check all these and you'll save yourself possible embarrassment and expense.

If the iron is slow to heat, you have it plugged into a light socket that isn't wired to handle the higher wattage demands of the iron. Plugging an iron into a long extension cord causes a voltage drop so the iron doesn't get enough current.

**Good To Know Anytime**

Grade school artists enjoy sharing their pictures and decorations with you and others in the family. Hang a bulletin board at eye level where your artists can show their works of art.

If you save the juice from spiced or pickled fruits, use it as the liquid when you bake a slice of ham or braise pork chops.

One medium size garment storage bag can hold more than just clothes. Use it for jacket-length clothes and you'll have the bottom one-third of the bag for sweaters.

Before a beef carcass is ready for shipment from a meat packing plant, it undergoes 45 processing operations.

Give leftover meats the same care as you would fresh meats. Store them in the refrigerator, covered closely to prevent drying. To save space, cut meat from bones, then wrap tightly in waxed paper or aluminum foil or put in covered container.

**Considerate Foodshopper**

Handle fresh fruits and vegetables carefully — pinching or dropping can bruise

## ● For The Farm Wife

(Continued from Page 15)

garine in large saucepan. Add salt, pepper, potatoes and water. Cook until potatoes are tender. Add corn and milk. Heat but do not boil. Serve with crackers. Makes 6 to 8 servings.

* * *

Cookies and cupcakes are the No. 1 lunchbox dessert

**GRAHAM CUPCAKES**

- ⅔ cup sifted flour
- ¾ cup sugar
- 2½ teaspoons baking powder
- ½ teaspoon salt
- 1⅔ cups graham cracker crumbs (about 20), finely rolled
- ½ cup shortening
- ¾ cup milk
- 1 teaspoon vanilla
- 2 eggs
- ½ cup raisins, floured

Sift together flour, sugar, baking powder and salt; combine with graham cracker crumbs. Place shortening in bowl. Add dry ingredients, milk and vanilla, mix until dry ingredients are dampened. Beat 2 minutes. Add eggs and beat one minute. Pour batter into cup cake cups, filling ⅔ full. Bake in moderate oven (350 degrees) 35-40 minutes. Cool, frost and decorate, if desired. Makes 18 cupcakes.

* * *

**RAISIN CRUNCH CLUSTERS**

- 1 cup (6-ounces) semi-sweet chocolate pieces
- 2 cups Special K cereal
- ½ cup seedless raisins

Melt chocolate over hot but not boiling water. Remove from heat. Add cereal and raisins, mixing well. Drop by teaspoonfuls onto waxed paper. Cool. Makes 2 dozen clusters.

* * *

**BUTTERSCOTCH CRISPS**

- ¾ cup shortening, soft
- 1¼ cups firmly-packed brown sugar
- 2 eggs
- 1 teaspoon vanilla
- 1½ cups sifted all-purpose flour
- 2 teaspoons baking powder
- ½ teaspoon salt
- 2½ cups Life cereal, crushed
- ¾ cup flaked or shredded coconut

Beat shortening and sugar together until creamy. Add eggs and vanilla; beat until light and fluffy. Sift together flour, baking powder and salt; add to creamed mixture. Mix well. Stir in cereal and coconut. Drop by tablespoonfuls onto greased cooky sheets. Bake in preheated moderate oven (375 degrees) 10 to 12 minutes. Makes 3½ dozen cookies.

* * *

**ORANGE BRAN MUFFINS**

- 1 cup sifted flour
- 4 teaspoons baking powder
- ½ teaspoon salt
- 1 cup whole bran cereal
- 1 cup milk
- 3 tablespoons margarine or butter
- ⅓ cup sugar
- 1 egg, beaten
- 2 tablespoons grated orange peel
- 1 orange, peeled, diced
- ½ cup coarsely chopped nuts

Sift flour, baking powder and salt together. Combine bran and milk; set aside to soften. Cream butter and sugar together; stir in beaten egg. To creamed mixture add softened bran; add sifted flour mixture, stirring only enough to blend. Add orange peel, orange pieces and nuts. Spoon into greased muffin cups. Bake at 425 degrees, 25 minutes. When done, remove from pan and cool on rack. Makes 12 muffins.

* * *

Try a salad in your lunch box —

**ORANGE WALDORF SALAD**

- 2 oranges, peeled, cut into bite-size pieces, drained (1 cup)
- 1 small apple, unpeeled, cored, diced (1 cup)
- 1 cup diced celery
- ¼ cup coarsely chopped walnuts
- 1 tablespoon honey
- 2 tablespoons mayonnaise

Combine all ingredients, mixing lightly. Spoon into small paper or plastic containers; cover and pack in lunch box.

* * *

**PINEAPPLE NUGGET COFFEE CAKE**

One 10-½ ounce package coffee cake easy mix

- 1 egg, unbeaten
- ½ cup pineapple juice
- ¼ cup drained crushed pineapple

To coffee cake mix add egg, juice and pineapple. Mix according to directions on package. Put batter in special pan that accompanies mix or one of your own. (Do not grease pan.) Sprinkle topping for cake evenly over batter. Bake in oven (375 degrees) about 25 minutes. Makes 8 servings.

**GOLDEN DIPPED FRENCH TOAST**

¼ cup pancake mix
2 eggs
¾ cup milk
½ teaspoon vanilla
Dash nutmeg
3 slices day-old bread

Place pancake mix, eggs, milk, vanilla and nutmeg in bowl. Beat with rotary beater until smooth. Cut bread slices in half diagonally. Dip slices into batter. Fry in butter in frying pan until golden brown. Sprinkle with confectioners' sugar; serve with butter and jelly. Makes 6 servings.

* * * * *

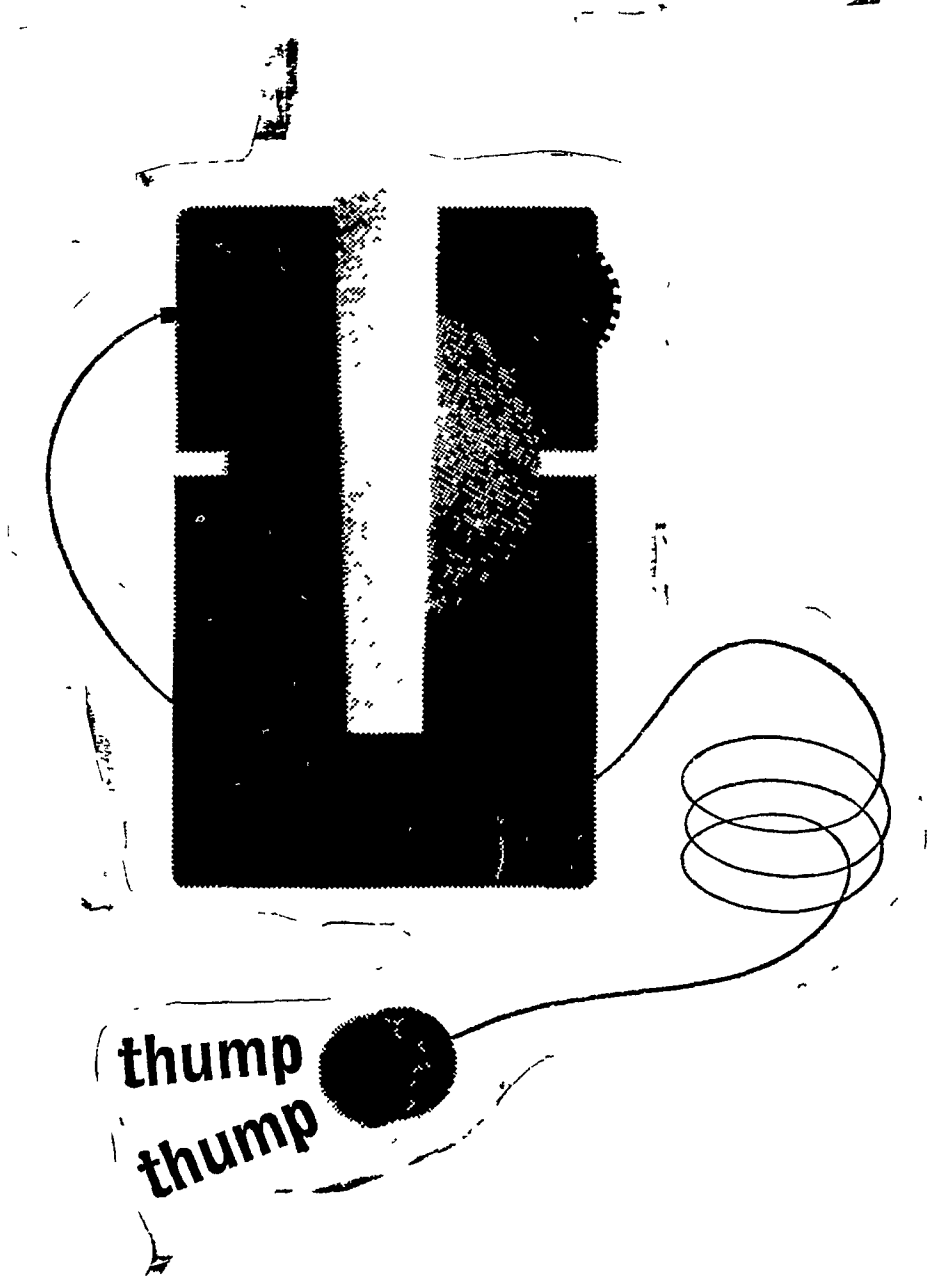
**VEGETABLE DIP**

1 cup finely chopped celery
1 tablespoon chopped chives
3 tomatoes, finely chopped
1 carrot, shredded
½ small cucumber, finely chopped
1 teaspoon garlic vinegar
½ teaspoon salt
⅛ teaspoon ground black pepper
Dash Worcestershire sauce

Combine first five ingredients. Blend remaining ingredients. Combine the vegetables and vinegar mixture. Chill 2 to 3 hours. Makes about 2 cups.

The bow and arrow was legalized for hunting in Pennsylvania in 1929, a few months after New York became the first state in the nation to permit bow hunting.

# Your Alcoa neighbor puts the heart in hearing aids



Here's one vital part of a hearing aid—a button that fits the human ear and contains the marvelous mechanism that helps people hear.

This is just one of thousands of precise little parts that leave Lancaster daily, and go on to serve throughout the world. Some others: Small wood screws and sheet screws for screens, doors and jalousies. Rivets and nails that curtail corrosion in planes, boats and truck bodies. Cartridges for marking pens. Threaded fasteners, roofing nails, common nails, electric cable accessories.

Thousands of important parts, for almost any product you can name, are made right here. They're made primarily from aluminum bar and rod, on automatic and hand screw machines, much like a very precise lathe. Each product is usually made to the customer's exact order.

This year, Alcoa/Lancaster marks the tenth year of serving customers from here to everywhere—with products made by neighbors in Lancaster.

(One of a series on Lancaster Works products)

them.

Push your cart with care If you accidentally bump your cart into someone, stop and apologize sincerely.

Return merchandise to its proper place if you change your mind and buy another product.

Knock an item off the shelf and stop to pick it up and replace it.

Learn the rules of the "express" line Usually, it's the number of items, not the number of units that matter

Wheel the empty cart through to its proper place.

**Hints For Vegetable Cookery**

When you cook fresh vegetables, cook only what you need for one meal.

Good nutrients are near the skin so pare vegetables only when necessary and keep the parings thin.

Valuable vitamins and minerals dissolve in water when you soak vegetables.

Go easy on the cooking water, and save the liquid to use in soup, gravy, or stew.

Cook vegetables until just tender — don't overcook.

Season sparingly . . . each person can add seasoning as desired.

* * * * *

**BUYING GUIDES FOR MATTRESS**

When a mattress reaches the hill and valley stage, it has outlived its normal comfort-service expectancy.

When is a mattress worn out? Some indications of it being worn out include sagging borders, broken stitching, and a flabby, packed-down look One sure sign of a worn-out mattress is how you feel when you get up in the morning. A worn-out mattress doesn't give you the even, equal support you need for relaxing, restful sleep.

Three basic types of mattresses are available: innerspring, foam, and solid upholstered.

Good mattresses have sturdy tickings and borders with reinforced ticking edges

You can't judge comfort by sitting on or punching a mattress The only way to test a mattress is to lie down on it . . . stretch out and see if it's long enough, wide enough, and firm enough for you.

Long-size twin or double bed mattresses allow extra length, king sizes provide extra length and extra width

**TWO TYPES OF BREAD CRUMBS**

Bread crumbs are of two types—dry and soft.

Dry bread crumbs are those that can be rolled fine and are used for eating foods for frying, stuffings, and for buttered crumbs The packaged bread crumbs you buy are of this type.

Soft bread crumbs are used for bread puddings, fondues stuffings, and buttered crumbs Crumble two-to-four-day-old bread to make soft crumbs.

There's a difference between a saucepan and a saucepot, although each one is a covered or an uncovered cooking utensil. A saucepan has one handle, a saucepot has two handles. And the capacity of both is stated in liquid measurement

## BEST FOOD BUYS
# Beef, Pork and Vegetables

Beef ribs, fresh pork shoulder, lamb and fryers will be the meat values at most area stores this weekend. Egg prices are down two cents. Best buys in vegetables are the hardy fall types, and apples will be the main attraction at fruit counters. More kinds of citrus are coming to market but prices remain seasonally high.

**Pork Values Increasing**

Pork supplies are increasing and it's showing up at retail meat counters in the form of more weekend features. The Boston butt may be a good choice this week because it's one of the better pork values from the standpoint of both cost and amount of lean meat per pound. The Boston butt comes from the top of the pork shoulder. A fresh picnic from the lower part of the pork shoulder is another thrifty choice. This cut is especially adaptable for a boiled dinner.

**Beef, Lamb and Fryers on Sale**

Retailers report declining wholesale fryer and lamb prices so look for good values on both this week. Some area stores will have feature prices on all lamb cuts. Fryer values may be either whole, cut-up or parts, depending on the store. Beef prices have changed very little in recent weeks but you'll see beef cuts featured in some stores about every week. Retailers like to feature beef to draw customers and to hold their regular patrons. This week, you'll find some local markets specializing standing rib roasts.

**Apples Fruit Buy This Week**

At fresh fruit counters, apples are the main attraction in observance of National Apple Week. Many retailers are offering apples at special prices during this national promotion. Bananas, pears, grapes, and variety melons are other value choices. More citrus coming to market with tang ines making their first appe ance in many stores this we However, prices are expec to remain a little higher th usual all season because of freeze damage last Decemb

There are over 3,500 reg al, state and local archery cl in the United States. Penn vania has 135 clubs enroll in the state archery asociat with 3,000 members.

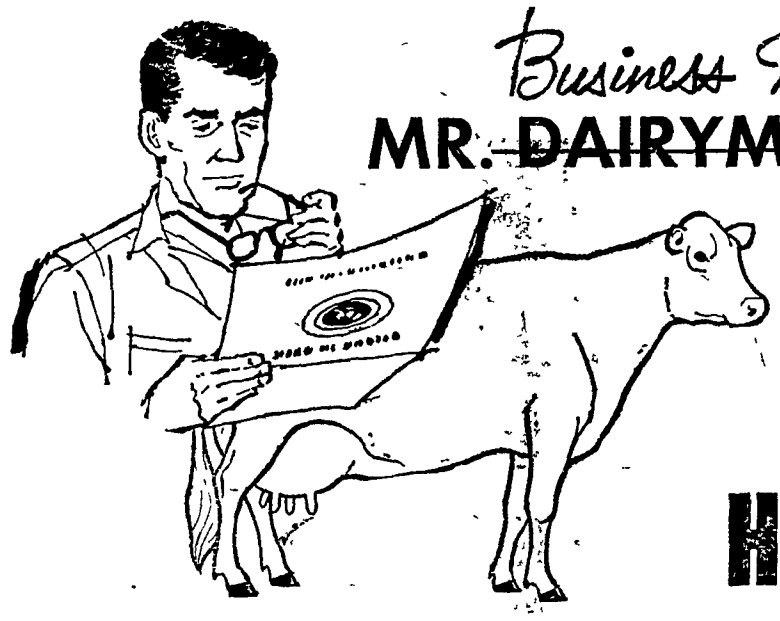
1500 calves.

ALL SALES AT 7:00 O'CLOCK, P.M.

Sale sponsored by W. Va. Dept. of Agriculture and South Branch Stockyards, Inc., Moorefield, West Virginia



HOW MUCH WOULD AN EXTRA TON OF MILK PER COW MEAN TO YOU?

Many dairymen who have challenged their herds — who have fed for more milk — have found that their cows can often produce as much as 2,000 extra pounds of milk per year when fed the PIONEER way.

If you're milking 100 head, an increase of 2,000 lbs. of milk per cow would mean 200,000 lbs. more milk per year for you to sell. At $4/cwt., the extra milk would bring an extra $8,000!

Management for profit the PIONEER way can mean big additional earnings for you. That's why thousands of successful dairymen rely on PIONEER feeds and feeding programs to help them milk out the total bred-in production capability of their cows — to help them get more profit from each cow.

Challenge your herd! Find out how good your cows really are. Stop in soon and talk over your production problems with us. Remember, there's a PIONEER feeding program to fit your need.

# Farm Women 2 Meet In Cabin

Mr. and Mrs Nathan Oberholtzer entertained Farm Women Society 2 in their cabin in Lycoming county.

Mrs. Alvin Graybill presided at the meeting Devotions were led by Mrs Fred Hahn. Each member spoke on what she enjoyed most about the trip to the cabin in response to roll call.

Contributions of $10 to the United Campaign, and $5 to the Manheim Community Library were voted.

Mrs Graybill reported on the executive board meeting to the group, reminding them to bring bazaar items for the bazaar table at the County Convention of Farm Women to be held Nov. 2.

Dinner was enjoyed at the cabin.

The next meeting of the group will be held at the home of Mrs Andrew Low.

# Your Herd Will Produce More Milk With Green Pastures Dairy Pellets!

## GREEN PASTURES DAIRY PELLETS MEAN MORE MILK AT LESS COST BECAUSE . . .

- A cow can make part of her required amino acids in the rumen but an efficient ration must supply the missing elements and also the balance. Green Pastures Dairy Pellets are full of high-quality protein that produces the amino acids your cow needs to produce more milk!
- Your cows' body functions require minerals and in Green Pastures Dairy Pellets you'll find them accurately balanced and supplied. Green Pastures is designed to keep cows healthy. And you know a healthy cow produces more milk!
- Green Pastures Dairy Pellets contain vitamin supplements according to the latest proven nutritional findings. These vitamins are essential whether your cows are on pasture or being barn-fed and they result in higher milk production.
- Progressive dairymen who are feeding MILLER & BUSHONG GREEN PASTURES Dairy Pellets recognize the outstanding nutritional value of this feed. Their herds are responding with more milk at lower cost per cow!
